

# Butterley Company Apprentices

1831, 1834, 1854 - 1875

## Introduction

This typescript brings together the pertinent Apprenticeship information from the surviving apprenticeship documents for the Butterley Company, which are deposited in the Derbyshire Record Office. They comprise:

D503B Box B Item 50	Apprenticeship Indentures	1861 - 1876
D503B Box B Item 54	Apprenticeship Indentures	1831 - 1834 &
	Letters of Memoranda	1856 - 1867
D503B Box B Item 55	Apprenticeship Indentures	1854 - 1864 &
	Letters of Memoranda	1858 - 1868
D503B Box D Item 114/1	Apprenticeship Indenture	1861
D503B Box D Item 114/2	Information Poster	1866

It should be noted that D503B Box B Item 50 also includes Item 51, but as they have been filed together and the individual documents do not have reference numbers on them, it is impossible to say which documents belong to which item, and so for purposes of this typescript they are all listed as Item 50.

The indentures are much more informative than the letters of memoranda but exhibit in most cases the characteristic of being retrospective, in that they are dated later than the actual date that the apprentice started their apprenticeship. For purposes of this typescript, the arrangement is by date of the start of the apprenticeship rather than the date of the indenture. The letters of memoranda do not give a location or parental details but usually the apprenticeship start date is the same as the letter of memorandum. Given that documents of both types do not survive for any apprentice, it may be the case that in cases where an indenture exists, it has replaced an earlier letter of memoranda, which the retrospective nature of most of the indentures.

Except for the earliest indenture of 1831, for purposes of uniformity, the apprentices are shown as apprenticed to the Butterley Company, though in some cases on the original documents, the apprentice is bound to the proprietors Messrs Jessop & Wright.

At the back of this typescript there are surname and location indices.

Butterley Company Apprentices 1831, 1834, 1854 - 1875

1831

Edward Gregory, aged 15 on 19th March instant, son of James Gregory of Calow, is apprenticed as a model maker to Benjamin Smith of Duckmanton, ironfounder, for 6 years, commencing 19th March 1831.
