

FLETCHER & STEWART LTD.

Fletcher and Stewart Ltd, originally George Fletcher & Co. Ltd. was founded by George Fletcher in 1838 primarily for the purpose of manufacturing sugar refining machinery. The name of the company was changed to Fletcher and Stewart Limited in 1964 when George Fletcher & Co Ltd was integrated with Duncan Stewart & Co Ltd in Glasgow, also an established sugar machinery manufacturer.

Although engaged in the sugar machinery business, towards the end of the last and the beginning of this century, the company additionally established its name in the coal mining industry of this country supplying surface decking plant, pit cages, tippers, ventilation equipment etc.

Fletcher and Stewart Limited were awarded the Queen's Award to Industry in 1966 on the grounds of export achievement, due specifically to the business of manufacturing sugar machinery.

These documents were deposited at the Record Office in June 1983.
